PRECISION HARDWARE FOR CONSIDERED SPACES

Britnox Trading LLC designs and supplies premium UK electrical wiring accessories — switches, sockets and connection units — engineered in solid metals and finished for architectural interiors.

OUR STORY

BUILT ON DETAIL

Founded in the UAE, Britnox was created to close the gap between everyday electrical fittings and the refined materials used in high-end interiors. We work with architects, interior designers and developers who treat switches and sockets as part of the design language — not an afterthought.

Every plate is screwless, every finish is curated, and every product is tested to British standards so that performance matches the visual promise.

WHAT WE DO

THE RESIDENCE COLLECTION

Our flagship range covers the complete specification of UK wiring accessories — from 1-gang switches to USB sockets, cooker controls and fused connection units — unified across eight metal finishes.

- Solid metal faceplates in eight architectural finishes
- Screwless flat-plate design with clip-on frames
- BS-compliant construction with a 10-year warranty

THE RANGE

EIGHT ARCHITECTURAL FINISHES

One precision-engineered screwless plate, offered across a curated palette of solid metal finishes so that every outlet in a project reads as part of the same detail.

DARK BRONZE

Deep, smoky bronze with a brushed grain.

BRUSHED BRONZE

Rich copper-brown tones for characterful rooms.

MATT BLACK

Bold and understated graphic contrast.

ANTIQUE BRASS

Aged golden warmth with a softly brushed patina.

Every finish is applied to the same screwless solid-metal plate, allowing finishes to be mixed across a project while switch profiles, depths and module cut-outs remain identical.

THE RANGE

THE PALETTE CONTINUED

SATIN BRASS

Warm golden tones with a brushed, light-catching texture.

GUN GREY

A muted industrial grey between black and silver.

SATIN NICKEL

Cool, refined steel with a subtle directional grain.

MATT WHITE

Clean and contemporary for bright, minimal interiors.

All finishes are available across the full Residence Collection — switches, sockets, USB outlets, cooker controls, fused connection units and dimmers — with a 10-year warranty.

THE RANGE IN DETAIL

Photographed as supplied. Every plate is a single screwless solid-metal face, 86 x 86 mm for single modules and 146 x 86 mm for double modules.

D A R K B R O N Z E

Four gang toggle switch

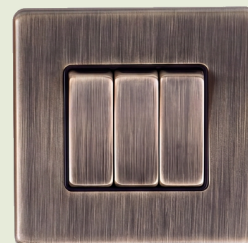

B R U S H E D B R O N Z E

13A switched socket outlet

M A T T B L A C K

Universal socket with USB-A and USB-C

A N T I Q U E B R A S S

Three gang switch with Britnox packaging

Plates are packed individually in recycled kraft cartons and boxed in project quantities.
Fixing screws, mounting hardware and a printed installation guide are supplied with every unit.
Samples and full technical sheets are available on request at info@britnox.ae.

TECHNICAL DETAILS

Engineered to UK wiring standards and finished by hand. Full technical sheets are available on request for specifiers and contractors.

SCREWLESS FLAT PLATE

A clip-on outer frame conceals all fixings, leaving an uninterrupted metal face with a low-profile edge that sits flush against the wall.

BRITISH STANDARDS COMPLIANT

Manufactured and tested to BS 1363 (plugs & sockets), BS EN 60669 (switches) and BS 5733 for general electrical accessories.

10 YEAR WARRANTY

Every Britnox plate carries a ten-year guarantee covering both mechanism performance and finish integrity under normal indoor use.

SOLID METAL CONSTRUCTION

Pressed steel and brass substrates, electroplated or powder-coated for depth of colour rather than printed or filmed.

RATED 13A / 250V

Sockets rated 13A 250V AC with shuttered outlets; switches from 1-gang to 6-gang, 1-way and 2-way.

STANDARD BACK BOX DEPTH

Fits 25mm boxes for single-gang switches and 35mm boxes for sockets and multi-gang plates.

AVAILABLE CONFIGURATIONS

- | | |
|---------------------------------------|---|
| — 1-6 Gang Switch, 1-Way & 2-Way | — 13A Single & Double Switched Socket |
| — 13A Socket with USB-A + USB-C | — 20A Double Pole Switch with Neon |
| — 45A Cooker Switch & Connection Unit | — Fused Spur, TV / Data & Dimmer Plates |

CLEANING

Wipe with a dry or barely damp soft cloth. Never use solvents, abrasive creams or alcohol-based sprays.

PATINA

Antique brass, brushed bronze and dark bronze are living finishes — they deepen and vary slightly.

BATCH MATCHING

Order a full project in a single batch; hand-applied finishes carry small tonal variation.
